Abstracts

According to our (Global Info Research) latest study, the global 3-Part Auto Veterinary Hematology Analyzer market size was valued at US\$ 880 million in 2025 and is forecast to a readjusted size of US\$ 1151 million by 2032 with a CAGR of 4.1% during review period.

In 2025, global 3-Part Auto Veterinary Hematology Analyzer production reached approximately 335 k units with an average global market price of around US\$ 2,550 per unit, and a gross profit margin of approximately 20%-40%. 3-Part Auto Veterinary Hematology Analyzers are automated diagnostic instruments used to measure animal blood cell parameters and classify white blood cells into three main groups. These analyzers are commonly used for complete blood count testing, red blood cell analysis, hemoglobin measurement, platelet counting, and basic leukocyte differentiation in animals. They are widely applied in pet hospitals, veterinary clinics, animal diagnostic laboratories, livestock veterinary stations, research laboratories, and breeding centers. Compared with 5-part veterinary hematology analyzers, 3-part systems are lower in cost, easier to operate, smaller in size, and suitable for routine screening and medium or low testing workloads. The industrial chain of 3-Part Auto Veterinary Hematology Analyzers includes upstream impedance detection modules, optical components, pumps, valves, syringes, tubing, sensors, chips, reagents, diluents, lysing solutions, calibration materials, displays, software, and plastic consumables. The midstream includes analyzer design, fluidic system integration, reagent matching, detection algorithm development, animal species parameter setting, assembly, calibration, testing, quality control, clinical validation, and regulatory compliance. Downstream applications include pet hospitals, veterinary clinics, livestock service centers, animal diagnostic laboratories, research institutions, universities, breeding farms, and mobile

veterinary services. Related services include installation, training, reagent supply, calibration, maintenance, software upgrades, quality control materials, and after-sales technical support.
