Abstracts

3D (three dimensional) technology has emerged as a technology that is being used in animation films, motion pictures, displays, imaging, and other products; which have finally extended to the other functions such as three dimensional modeling, designing, and rapid prototyping. 3D technology provides illusion effects of depth perception; and viewers get to enjoy a different kind of an experience with this technology. There are a number of products and applications of 3D technology such as 3D display, 3D film, 3D camera, 3D animation, and 3D printer, among others. All these applications or products use 3D as their core technology. To generate certain images of 3D, these applications and products use various technologies, and programming and Integrated Circuits (ICs).
