Scope of the Report:

This report studies the 3D CAD Software market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the 3D CAD Software market by product type and applications/end industries.

The on-premise segment dominated the market in 2016 as this software can be directly installed on the user's workstation. Companies are offering their customers with on-premise products and solutions such as electronic software downloads for product updates along with initial product fulfillments.

3D CAD's on-premise products provide safety software solutions designed to meet the needs of police departments, fire departments, and other public safety solutions. Moreover, these solutions help in bringing 3D CAD to mobiles by configuring products and solutions according to customer's preferences.

The cloud-based 3D CAD software offers the same benefits and capabilities as its on-premise counterpart. However, cloud-based CAD offers cloud services through an app and is updated on a remote server, which can be accessed by paying a monthly or annual fee.

The manufacturing segment dominated the industry in 2016 by capturing a revenue share of over 20%. The evolution of solutions such as 4-, 5-, and C-axis machines is expected to augment the demand for 3D CAD software in the manufacturing sector. Furthermore, the software assists manufacturers to develop prototypes and simulate the movement of components or parts in the production process. It also allows them to get

a magnified version of the model by getting a 3D view of the product. The increasing investment in various 3D printing technologies is helping the production of different production parts with a wide variety of materials depending upon the requirements of the end user. The software helps manufacturers to quickly design tooling, jigs, fixtures, and custom gauges and components of work holding.

The global 3D CAD Software market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of 3D CAD Software.
