3D galvo scan head is a high-precision, high-speed laser scanning device, which consists of galvanometer, drive circuit, control software and servo system. It can accurately control the movement trajectory of laser beam and realize accurate processing of target materials. The galvanometer is equipped with a reflector, which is driven by electromagnetic and swings rapidly, so that the laser beam scans in three-dimensional space, thus completing the drawing of complex graphics or the three-dimensional modeling of objects. 3D galvanometer plays an important role in modern manufacturing industry with its high efficiency, high precision and flexibility.
