The global 3D Metrology market size is expected to reach \$ 9822 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

3D Metrology refers to 3D Metrology Equipment. The 3D Metrology Equipment is the dimensional analysis method used to overall measure the object and acquires all surface points of an object including the hidden points such as non-accessible undercuts. The 3D Metrology Equipment is divided into fixed coordinate measuring machines (CMM), optical digitizers and scanners (ODS), and 3D video measuring machines (VMM) by product. These products are used in the quality control process to ensure the accuracy of manufactured products. They are widely used in the industries such as automotive, aerospace, transportation, constructional, power generation, electronics, medical technology and others.

Globally, the manufacturing technology of 3D Metrology System is constantly developing. And some enterprises, like Hexagon, Zeiss, Keyence, etc. are well-known for the wonderful performance of their 3D Metrology System. At the same time, Asia-Pacific, occupied 35% revenue market share.
