According to our (Global Info Research) latest study, the global 3D Printer Hardened Steel Nozzle market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

A 3D printer hardened steel nozzle is a component used in 3D printing that is made from hardened steel material. It is designed to be more durable and resistant to wear compared to standard brass nozzles, which are commonly used in 3D printers. The hardened steel nozzle is typically used when printing with abrasive filaments that contain particles such as carbon fiber, metal, or wood. These filaments can cause accelerated wear on standard brass nozzles due to their abrasive nature.
