3D wall panels are a type of decorative wall material with three-dimensional surface patterns and rectangular shape. They're used to cover walls, making up visible or exposed wall surfaces. Designed for decorative and functional use, wall panels offer soundproofing and insulation, atop giving a uniform appearance.

Designed to eliminate the need for adding a finishing material on walls or applying paint, 3D wall panels give a consistent appearance and reduce costs of construction. The panels are usually finished on a single side only because they're often installed on concrete walls or bricks with rough surfaces.

This report studies the global 3D Wall Panels production, demand, key manufacturers, and key regions.
