Abstracts

The global 4-Cyanobenzyl Bromide market size is expected to reach \$ 19.77 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

4-Cyanobenzyl Bromide is an aromatic halogenated intermediate with both benzyl bromide and nitrile functional groups. With the molecular formula C_8H_6BrN and CAS No. 17201-43-3, it is mainly used as a pharmaceutical intermediate, fine-chemical building block, functional-material intermediate and organic synthesis reagent. Its reactive benzyl bromide group enables nucleophilic substitution, coupling and molecular modification reactions, making the product more suitable for small-batch, high-purity and custom synthesis rather than commodity-scale production. In 2025, Global 4-Cyanobenzyl Bromide sales is estimated at 140 Tons, with an average ex-works price of 110 US\$/Kg, with a gross margin range of 25%-45%. The value chain of 4-Cyanobenzyl Bromide starts from p-cyanobenzyl alcohol, brominating agents, solvents and basic fine-chemical feedstocks; the midstream covers custom synthesis, purification, quality testing and packaging of halogenated aromatic intermediates; and downstream demand mainly comes from pharmaceutical intermediates, functional materials, organic building blocks and process-development applications.

The main driver of the market is sustained demand from pharmaceutical and fine-chemical R&D for highly reactive aromatic intermediates. 4-Cyanobenzyl Bromide contains both nitrile and benzyl bromide functionalities, making it useful for introducing drug-like fragments, modifying nitrogen-containing aromatic structures and preparing functional-material precursors. As a result, demand is supported by innovative drug discovery, generic drug process development, small-molecule building-block libraries and custom synthesis services. Downstream customers usually care more about purity, batch consistency, impurity control and kilogram-scale production capability than simply

low pricing, which benefits suppliers with strong custom synthesis and documentation capabilities.
