Abstracts

According to our (Global Info Research) latest study, the global 4-Ethenylphenyl Acetate market size was valued at US\$ 84.64 million in 2025 and is forecast to a readjusted size of US\$ 144 million by 2032 with a CAGR of 7.9% during review period.

4-Ethenylphenyl Acetate is an aromatic vinyl ester monomer with the molecular formula $C_{10}H_{10}O_2$. The molecule contains a polymerizable vinyl group and an acetoxy functional group attached to a benzene ring, enabling it to participate in free-radical polymerization while providing a protected phenolic functionality. It is widely used as a specialty monomer and synthetic intermediate for the preparation of functional polymers, photoresists, advanced coatings, adhesives, electronic materials, and fine chemicals. Following polymerization, the acetoxy group can be hydrolyzed to generate hydroxyl-functional polymers with improved chemical reactivity and material performance.

In 2025, global sales of 4-Ethenylphenyl Acetate reached approximately 762 tons, with an average global market price of around US\$ 108/kg. As a niche chemical, its global production capacity is low, and its gross profit margin is approximately 20%-40%.

4-Ethenylphenyl Acetate is a niche, high-value specialty monomer primarily used in functional polymers, electronic materials, and fine chemical synthesis. Compared with commodity vinyl monomers, it is mainly employed in high-performance material systems where post-polymerization functionalization is required. The protected acetoxy group can be converted into a phenolic hydroxyl group after polymerization, enabling enhanced chemical reactivity, adhesion, thermal stability, and surface functionality. As a result, the material is widely utilized in functional resins, photoresist polymers, specialty

coatings, advanced adhesives, and other high-performance polymer systems.

Market demand is increasingly supported by the development of advanced electronics, semiconductor manufacturing, high-performance composites, and specialty polymer technologies. Growing interest in precisely designed functional polymers and post-functionalizable monomers is creating additional opportunities for this material. However, commercial production requires stringent control of purity, polymerization inhibitors, and storage stability, resulting in relatively high technical barriers and a limited number of qualified manufacturers. Going forward, continuous innovation in electronic chemicals, functional polymer engineering, and advanced coating technologies is expected to support broader adoption of 4-Ethenylphenyl Acetate while maintaining its position as a specialized, high-value chemical rather than a bulk commodity.

This report is a detailed and comprehensive analysis for global 4-Ethenylphenyl Acetate market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global 4-Ethenylphenyl Acetate market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global 4-Ethenylphenyl Acetate market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global 4-Ethenylphenyl Acetate market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global 4-Ethenylphenyl Acetate market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/kg), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for 4-Ethenylphenyl Acetate

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global 4-Ethenylphenyl Acetate market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include GM Chemical, UniVOOK Chemical, Hunan Huateng Pharmaceutical, East Star Biotech, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

4-Ethenylphenyl Acetate market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Purity

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global 4-Ethenylphenyl Acetate Consumption Value by Type: 2021
Versus 2025 Versus 2032

1.3.2 Purity
