## Abstracts

The pallet four-way shuttle is an intelligent device used for pallet cargo handling. It can travel both vertically and horizontally, and can reach any position in the warehouse through the shelf track. The horizontal movement and access operations of goods in the rack are only completed by a pallet-type four-way shuttle, and the degree of automation of the system is greatly improved by changing layers through the hoist. It is the latest generation of intelligent handling equipment for pallet-intensive storage solutions.
