According to our (Global Info Research) latest study, the global 48V Electric Machine market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

The 48-volt motor is an electric motor with a rated voltage of 48 volts, which is widely used in the electric auxiliary system of mild hybrid vehicles, the drive system of electric bicycles and electric motorcycles. It is characterized by high efficiency, low noise, smooth operation and high safety, and is suitable for low-voltage power systems. The 48-volt motor provides reliable power support in these applications. At the same time, due to the low voltage, it reduces the risk of electric shock, is easy to maintain, and has a relatively low cost. It is an ideal choice for many small and medium-power electric equipment.
