Abstracts

The global 4D Radar market size is expected to reach \$ 2038.8 million by 2029, rising at a market growth of 62.6% CAGR during the forecast period (2023-2029).

In the global market, the core manufacturers of 4D radar are Sensitech, Huawei, BOSCH, Continental AG, ect. The top players in the industry account for about 50 per cent of the market share. North America, Europe, and Asia-Pacific are the major production regions for this product, with Asia-Pacific accounting for more than 70% of the global market share. The product can be categorised into chip cascade and radar chipset based on the type of chip. The product is widely used in automotive, aerospace & defence, intelligent robotics, and other industries.

4D radar is a technology that uses echolocation and a concept called time-of-flight measurement to map objects in a 3D environment. It is currently being tested in the autonomous vehicle industry to map the locations of items in a vehicle's path. It differs from the older technologies like Lidar, standard radar, and cameras because 4D radar can tell when a vehicle is moving and how fast in all types of weather and environmental conditions.

Given that most companies in the sector are late to volume production, with many starting in 2021, this report provides data from 2021 onwards.

This report studies the global 4D Radar production, demand, key manufacturers, and key regions.
