According to our (Global Info Research) latest study, the global 4G Security Camera market size was valued at US\$ 1288 million in 2025 and is forecast to a readjusted size of US\$ 2768 million by 2032 with a CAGR of 11.7% during review period.

4G security cameras are wireless surveillance solutions that enable remote video monitoring without cabling, making them particularly suitable for remote areas, temporary construction sites, or mobile surveillance needs. With the expansion of 4G network coverage and increased data rates, 4G security cameras have seen significant improvements in image quality and stability, making them widely used in security, traffic monitoring, and wildlife monitoring. Furthermore, integrated cloud storage and intelligent analysis capabilities allow users to access surveillance footage anytime, anywhere and receive real-time alerts.

In 2024, global 4G Security Camera production reached approximately 25.86 million units, with an average global market price of around US\$ 43.4 per unit.

Global demand for wireless remote video surveillance is rapidly increasing, especially in remote areas with limited network infrastructure. 4G security cameras, with their independence from wired networks, have become a key growth driver. Regionally, China's market performance is particularly impressive. In 2024, China's 4G surveillance camera market was projected to reach US\$658 million, accounting for 58.63% of the global market, significantly higher than any other country or region. By 2031, China's market is projected to reach US\$1.519 billion, further increasing its share of the global market to 61.58%. As the world's largest security market, China's rapid urbanization, the advancement of smart city development, and growing demand for wireless surveillance

equipment in rural and remote areas are driving the widespread adoption of 4G surveillance cameras.

In terms of manufacturers, the global 4G security camera market is dominated by a handful of core companies: Hikvision, Dahua, Joan Technology, TP-LINK, and Huawei. Together, these companies hold a 63.42% market share. As industry leaders, Hikvision and Dahua maintain their leading position in the market, leveraging their strong R&D capabilities and brand influence. Joan Technology and TP-LINK have achieved steady growth by focusing on niche markets and expanding overseas. Huawei, leveraging its advantages in communications technology, is gradually gaining ground among professional and industrial customers.

The global 4G security camera market is transitioning from rapid growth to a mature and stable market. As the world's largest growth engine, the Chinese market will continue to lead industry innovation and expansion. Competition among manufacturers is intensifying, and technological upgrades and application diversification are key to maintaining a competitive advantage. In the future, with the widespread adoption of 5G and the deep integration of artificial intelligence, 4G security cameras will play a vital role in more complex scenarios, driving the global security industry into a new era of smarter and more efficient development.
