According to our (Global Info Research) latest study, the global 4K UST Projectors market size was valued at USD 953.6 million in 2023 and is forecast to a readjusted size of USD 4373.9 million by 2030 with a CAGR of 24.3% during review period.

Projectors with ultra-short throw lenses are designed to produce larger projected images at a shorter throw distance. This means that unlike the standard or long throws projectors; you can get the big picture even when you’re caught in a tight space environment with much less space required between the projector and the screen. Gone are the worries about landing a tiny projected image or blocking out the projections with your shadows when you’re using a standard/long throw projector in a space-constrained room.

Asia-Pacific is the largest 4K UST Projectors market with about 33% market share. North America is follower with about 30% market share.
