## Abstracts

The global 55-inch 4K UHD Flat-screen TV market size is expected to reach \$ 39016 million by 2032, rising at a market growth of 14.8% CAGR during the forecast period (2026-2032).

In 2025, global production of 55-inch 4K UHD Flat-screen TVs reached approximately \$20.16 million units, with an average selling price of \$718 per unit. A 55-inch 4K UHD Flat-screen TV refers to a 55-inch television terminal that adopts a flat-panel display form factor and has a physical resolution of UHD-1/4K (3840x2160). It features high resolution, high frame rate, high dynamic range, wide color gamut, and high quantization accuracy. It typically combines with HDR (High Dynamic Range), wide color gamut, smart operating systems, and high refresh rates and HDMI 2.1 functionality for gaming to constitute an 'experience-level upgrade.' In the consumer market, 55-inch displays are often considered the mainstream size for living rooms and bedrooms, balancing immersion with spatial adaptability. They feature high resolution, high frame rate, high dynamic range, wide color gamut, and high quantization accuracy. Applications include home entertainment and console/cloud gaming, as well as hotel and apartment displays, conference and educational displays, and information dissemination and content distribution terminals in commercial venues. The upstream of the industry chain includes glass substrates, polarizers/optical films, TFT backplanes and LCD/OLED panels, backlights and MiniLED lamp boards/drivers, T-CONs and driver ICs, main control SoCs and storage, Wi-Fi/Bluetooth/HDMI connectivity devices, structural components and heat dissipation, power supplies and speakers; the midstream involves complete system manufacturing (system integration, image quality algorithms, reliability and certification); and the downstream extends to end users through offline home appliance retail/key account channels, operators and engineering channels, e-commerce and cross-border platforms, installation and delivery, covering a

wide range of home consumers and commercial users across various industries. Gross profit margin is approximately 15-20%.
