72-cell rectangular silicon wafer refers to a type of silicon wafer used in photovoltaic (solar) modules, and its name is usually related to the specifications of solar cell modules. The "72-cell" here usually means that a photovoltaic module contains 72 silicon wafers, and the "rectangular silicon wafer" means that the shape of these silicon wafers is rectangular. Specifically, this type of module is generally composed of 72 rectangular silicon wafers arranged in an array, and is commonly seen in large photovoltaic power generation projects. This type of module is usually larger in size and power, and is suitable for ground-mounted or large rooftop photovoltaic systems.
