The 80 Plus certification is a program initiated by the 80 Plus organization to promote energy efficiency in computer power supplies. An 80 Plus Certified Server Power Supply refers to a server power supply unit (PSU) that has been certified by the 80 Plus organization as meeting certain efficiency standards.

To achieve 80 Plus certification, a power supply must demonstrate efficiency levels of at least 80% or higher at 20%, 50%, and 100% of rated load, as well as a power factor of 0.9 or greater at 100% load. There are different levels of certification within the 80 Plus program, such as 80 Plus, 80 Plus Bronze, 80 Plus Silver, 80 Plus Gold, 80 Plus Platinum, and 80 Plus Titanium, with each level representing increasingly higher efficiency standards.

In the case of a server power supply, having an 80 Plus certification ensures that the PSU operates more efficiently, reducing energy consumption and heat generation, which can be particularly important for servers running 24/7 in data centers where energy efficiency and cooling costs are significant considerations.
