The 800-ton thin plate press is a large press that is mainly used for pressing and forming thin plate materials. Its main feature is that it can provide up to 800 tons of pressing force. This ability enables it to cope with large, complex and high-pressure thin plate materials. 800-ton thin plate presses are widely used in industries such as steel, machinery, ships, automobiles, construction, petroleum, and chemicals, especially in processes that require strong pressure forming of large metal materials. It is also suitable for the pressing process of various plastic materials, including powder product molding, plastic product molding, cold (hot) extrusion metal molding, thin plate extension, as well as stamping, bending, flanging, correction, etc.

Globally, the thin plate press market continues to grow, especially in the fields of automobiles, electronics, aerospace, etc., where thin plate presses are increasingly used. As an important model, the 800-ton thin plate press also benefits from this trend, and the market demand has steadily increased. With the continuous advancement of science and technology, the press market is gradually moving towards automation and intelligence. Many press manufacturers have begun to apply automation and digital technologies to their products, including 800-ton thin plate presses, to improve production efficiency and product quality. In summary, the 800-ton thin plate press market is showing a steady growth trend worldwide.
