The global 800V HVDC market size is expected to reach \$ 14970 million by 2032, rising at a market growth of 24.4% CAGR during the forecast period (2026-2032).

800V high voltage direct current (HVDC) is an electric energy transmission or application technology with 800 volts of direct current as the core. It reduces transmission losses by increasing voltage levels and supports high-power and high-efficiency energy conversion. Its core components include SiC/GaN power devices, multi-level converters and intelligent control systems. Compared with traditional 400V systems, it can reduce line losses by 50% and increase power density.
