The global A-Frame Camper market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

An A-frame camper, also known as a folding camper or pop-up camper, is a type of recreational vehicle (RV) that features a collapsible, compact design. These campers are characterized by their A-frame shape when fully set up, and they typically fold down for easy towing and storage. When unfolded, they provide living space, including sleeping quarters, a small kitchen area, and sometimes a dining area. A-frame campers are popular for their lightweight, easy-to-tow design, and they often include amenities such as electricity, water hookups, and propane systems for cooking and heating. They offer a convenient and comfortable camping experience while being more compact and maneuverable than traditional larger RVs.
