Abstracts

According to our (Global Info Research) latest study, the global A60 Marine Fire Dampers market size was valued at US\$ 22.74 million in 2025 and is forecast to a readjusted size of US\$ 31.47 million by 2032 with a CAGR of 4.9% during review period.

The A60 marine fire damper is a safety valve installed in the ship's air conditioning and ventilation ducts, A60 fireproof bulkheads or deck crossings. It can automatically close in the event of a fire, blocking the spread of flames, hot smoke and high-temperature gases, and maintaining the integrity of the ship's fire protection zone. It usually requires certification from a classification society or IMO.

The upstream includes stainless steel, galvanized steel plates, refractory sealing materials, actuators, temperature-controlled fuses, sensors, spring return mechanisms and ship classification certification services; the downstream mainly includes merchant ships, cruise ships, military ships, offshore engineering platforms, ship repair and modification and ship HVAC system integrators.

The global A60 marine fire damper market price is US\$1,300 per piece, with global sales of approximately 17,000 pieces, annual production capacity of 25,000-32,000 pieces, and industry profit margin of approximately 27%.

In the future, the global market will be driven by the tightening of ship safety regulations, the renovation of old fleets, and the growth in the construction of LNG ships, cruise ships, offshore platforms and special ships. Products will be upgraded to high fire resistance, low leakage, corrosion resistance, lightweight and intelligent. Electric

actuators, remote status feedback, fire linkage and maintenance monitoring functions will become more common. The demand for products with stainless steel structure, modular installation and adaptability to certifications from different classification societies has increased, and shipyards in Europe, Japan, South Korea and China are still the main application areas. As the integration of ship energy-saving and safety systems increases, A60 marine fire dampers will be more linked to HVAC, fire alarm and ship automation platforms.
