Abstracts

According to our (Global Info Research) latest study, the global Absorption Film Capacitors market size was valued at US\$ 370 million in 2025 and is forecast to a readjusted size of US\$ 459 million by 2032 with a CAGR of 3.2% during review period.

In 2025, the global production of absorption film capacitors reached 299 million units, with an average selling price of US\$1.2 per unit. The global annual production capacity of absorption film capacitors is approximately 450 million units, with a gross profit margin of approximately 20.1%. Absorption film capacitors, also known as absorptive film capacitors, are a special type of film capacitor primarily used to absorb resonant energy and suppress harmonic noise in circuits. They combine the excellent performance of traditional film capacitors with the energy absorption function, and are widely used in power electronics and communication systems to improve power quality. The upstream of the absorption film capacitor industry chain includes pulse width modulation film materials, dielectric materials, electrode materials, solvents and additives, etc.; the midstream consists of absorption film capacitor manufacturers; and the downstream applications are mainly in the automotive, consumer electronics, and aerospace industries.

The thin-film capacitor market is experiencing continuous growth and technological optimization, driven by stable demand from new energy, energy storage, consumer electronics, and automotive electronics for high-capacity, high-voltage, and low-loss capacitors. Industry trends include improved dielectric properties due to material advancements, innovations in packaging and heat dissipation technologies, and stringent requirements for high reliability, wide temperature range, and long lifespan. Furthermore, accelerated localization, supply chain localization, and cost control have

become key competitive factors, with leading manufacturers consolidating their market position through capacity expansion, vertical integration, and customized solutions.
