According to our (Global Info Research) latest study, the global AC Air Curtain market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Air curtains, also known as air doors, are specialized devices installed at entrances to create an effective barrier for controlled airflow. Ideal for industrial and commercial environments, air doors improve energy efficiency by blocking the exchange of indoor and outdoor air. They help achieve optimal climate control, reduce temperature variations and minimize the intrusion of dust, pollutants and insects. AC type is the basic unit of HCR - horizontal, curvilinear and recirculating. Its airflow creates a counterflow force equal and opposite to the two-way flow force caused by the air temperature difference.
