According to our (Global Info Research) latest study, the global AC Condensers market size was valued at USD 600.9 million in 2023 and is forecast to a readjusted size of USD 911 million by 2030 with a CAGR of 6.1% during review period.

The AC (Air condition) unit has three key parts. These are the compressor, the condenser, and the evaporator. A condenser is a device or unit used to condense a substance from its gaseous to its liquid state, by cooling it. In so doing, the latent heat is given up by the substance and transferred to the surrounding environment. Condensers can be made according to numerous designs, and come in many sizes ranging from rather small (hand-held) to very large (industrial-scale units used in plant processes).
