## Abstracts

According to our (Global Info Research) latest study, the global AC-DC DIN Rail Power Supply market size was valued at USD 726.4 million in 2023 and is forecast to a readjusted size of USD 975.8 million by 2030 with a CAGR of 4.3% during review period.

DIN guideway power supplies are based on a series of standard guideway power supplies created by the German Institute for Standardization (DIN), Germany's national standards organization. This power supply converts alternating current (AC) to direct current (DC) at various ranges. The end user can obtain the desired DC output power by using various Settings of the power supply. The power supply is easy to install and requires little or no maintenance. Due to the advantages of the guideway power supply mentioned above, downtime is kept to a minimum and does not affect plant efficiency and production. DIN guide rail power supply is mainly used in industrial automation control, light industry, instrument and meter, process control and other fields. It has become an essential part to ensure the quality and reliability of power supply facilities.
