## Abstracts

According to our (Global Info Research) latest study, the global AC Hose market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

AC Hose are important parts of the AC assembly of an automotive. AC hoses help to attach a pipe to the air-conditioning unit and intake/exit units in an Automotive. AC Hose aid in the air flow to and fro the AC unit in a vehicle. Both AC pipe and hose are designed to bear high pressure in all environments. In working condition, an AC pipe faces the pressure of 25–30 bar whereas an AC Hose faces a pressure of 10-15 bar which can jump to 25–30 bar in emergency mode. Both AC pipes and hose are produced with high-quality material since they are prone to break during the work due to high pressure. AC pipes are more prone to wear and tear under normal working conditions and can quickly face corrosion, material fatigue, increased pressure in the system, accidents and environmental influences. AC hoses are made of metals, polymers or plastic which by its function must have high tensile strength and must not break during the work. All the Automotive are bound to have an air conditioning unit due to government regulations for the auto manufacturers.

AC Hose market is mainly driven by the increasing demand in of automotive globally. AC Pipes and hoses in a vehicle are prone to wear, tear and damage which also boost the demand. Many new advanced materials are springing in the market every day which is used in AC Hose. AC Hose will witness a rise in the demand because of its use in cars, SUV, Sedan, TUV, XUV and other types of Automotive. High-quality polymer products are getting traction in the market especially in luxury vehicle segment. Factor that fuels up the growth of the AC Hose market is that the affordable price of AC Hose because of cheap production cost. AC Hose market is expected to grow during the
