The global AC Motor market size is expected to reach \$ 21510 million by 2032, rising at a market growth of 1.6% CAGR during the forecast period (2026-2032).

AC Motors is an electric motor driven by alternating current (AC). The AC Motor commonly consists of two basic parts, an outside stationary stator having coils supplied with alternating current to produce a rotating magnetic field, called “stator” ;and an inside rotor attached to the output shaft producing a second rotating magnetic field and output kinetic energy, namely “rotor”. In this report we mainly talk about the AC Motors power is larger than 1HP.

China is the largest AC Motor market with about 44% market share. North America is follower, accounting for about 20% market share.
