The global AC Variable Frequency Electric Drive Drill market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

AC variable frequency electric drive drilling rig, also known as VFD drilling rig, is a kind of drilling rig used in various industries to drill holes on different materials (such as metal, wood and plastic). VFD drilling rig is equipped with AC variable frequency electric drive device, which can accurately control the speed and torque of the drilling rig. The speed of the drill bit can be adjusted to match the specific drilling requirements of the drilled material, so as to achieve more efficient and accurate drilling. In addition to variable frequency drive, VFD drilling rig can also have other advanced functions, such as digital display for monitoring drilling parameters, automatic speed control and overload protection, to prevent damage to drilling rig or workpiece.
