Abstracts

The global Accelerated Solvent Extraction (ASE) market size is expected to reach \$ 121 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

Accelerated Solvent Extraction (ASE) is a fully automated technique that uses common solvents to rapidly extract solid and semisolid samples. ASE operates at temperatures above the normal boiling point of most solvents, using pressure to keep the solvents in liquid form during the extraction process. Typically, ASE methods are completed in 15–25 min, while consuming only 15–50 mL of solvent. ASE was introduced in 1995 by Dionex Corporation and is recommended under US EPA Methods 3545 and 3545A for extraction of organ phosphorus pesticides.

North America is the largest producer of Accelerated Solvent Extraction (ASE), with a market share more than 70%. It was followed by China with 15%. ThermoFisher Scientific, FMS, Buchi, LabTech and Shanghai Spectrum are the key manufacturers of industry, and ThermoFisher Scientific had more than 70% market share.

This report studies the global Accelerated Solvent Extraction (ASE) production, demand, key manufacturers, and key regions.
