According to our (Global Info Research) latest study, the global Accounting, BMS, Payroll and HCM Software market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Accounting software is a foundational technology for many companies, and as a business grows having a powerful, effective accounting solution becomes increasingly critical. Most accounting software packages offer the same basic features necessary for managing finances: accounts receivable, accounts payable, general ledger, billing and invoicing, purchase and sales orders, and reporting. Beyond basic functionality, the top accounting solutions offer additional features to give users more power, flexibility and customization. Oftentimes accounting solutions are closely integrated with other key software solutions.

Business Management Software (BMS) is a broad classification for several integrated applications that help run a business. In this report, Business Management Software (BMS) includes ERP. Enterprise resource planning (ERP) is the integrated management of core business processes, often in real-time and mediated by software and technology.

Human capital management (HCM) is the comprehensive set of practices for recruiting, managing, developing and optimizing the human resources of an organization. HCM has come to be nearly synonymous with the human resources (HR) function in organizations. In HR technology, the comprehensive software systems for managing HR processes differ little from HCM suites.

Payroll software is a system that automates and streamlines the process of paying a company's employees. It may sound straightforward, but the payroll process includes a lot of tasks such as calculating deductions and withholdings, producing pay slips and tax forms (and other reports), processing or depositing payment directly to employee's bank account, voiding payments if need be, and even printing checks. Payroll software simplifies and automates the aforementioned tasks to shorten cycle times and reduce manual errors.

In the Middle East and Africa region, the major players in accounting, BMS, compensation and human capital management software are SAP, Oracle(NetSuite), Automatic Data Processing, Inc., Pachex, Microsoft, Intuit, Sage, Workday and IBM Corporation.
