According to our (Global Info Research) latest study, the global Accumulator Safety and Shut-off Blocks market size was valued at USD 1399.4 million in 2023 and is forecast to a readjusted size of USD 1938.5 million by 2030 with a CAGR of 4.8% during review period.

The Accumulator Safety and Shut-off Block serves for the protection, isolation and unloading of hydraulic accumulators. The connection between the accumulator shut-off block and the accumulator is realized by means of an accumulator adapter.

Safety and shut-off blocks allow an easy installation of accumulators to hydraulic systems. They can either shut-off or release the pressure of the accumulator. They serve to shut off and relief the pressure of hydraulic accumulators, while they fulfill all safety-related requirements for their operation in a simple, space-saving design.
