According to our (Global Info Research) latest study, the global Acetic Acid market size was valued at USD 11190 million in 2023 and is forecast to a readjusted size of USD 14370 million by 2030 with a CAGR of 3.6% during review period.

Acetic acid is a colourless liquid organic compound with the chemical formula CH_3COOH (also written as $\text{CH}_3\text{CO}_2\text{H}$ or $\text{C}_2\text{H}_4\text{O}_2$). When undiluted, it is sometimes called glacial acetic acid. Vinegar is roughly 3–9% acetic acid by volume, making acetic acid the main component of vinegar apart from water. Acetic acid has a distinctive sour taste and pungent smell. In addition to household vinegar, it is mainly produced as a precursor to polyvinyl acetate and cellulose acetate. It is classified as a weak acid since it only partially dissociates in solution, but concentrated acetic acid is corrosive and can attack the skin.

China is the world's largest producer of acetic acid, accounting for 52.70% of the world's total production capacity in 2017. Besides, Celanese's acetic acid plant has become the world's largest acetic acid production plant, its production capacity has reached 3150 K MT. BP-Amoco company is the No.1 of European producers, with the production capacity of 2800 K MT.
