Acid dye fixing agent is a chemical substance that can interact with organic substances such as cellulose and protein to firmly bind the dye to the surface of the substance. It is generally a high molecular weight aromatic sulfonic acid condensate. It has a significant color fixation effect, little effect on color and feel, and is environmentally friendly. It is suitable for the color fixation treatment of anionic dyes (acid dyes, metal complex dyes) on wool, nylon, silk, leather and other fabrics after dyeing. It performs well in textile printing and dyeing, leather processing, papermaking, wood preservation, fabric shrinkage prevention and other industries, especially in improving the washing fastness of acid dyeing.
