## Abstracts

The global Acid Fracturing Truck market size is expected to reach \$ 2748.1 million by 2029, rising at a market growth of 5.0% CAGR during the forecast period (2023-2029).

The fracturing and acidification truck is an important piece of equipment used in oil and gas exploration and development, and its development prospects are closely related to the development of the domestic oil and gas industry. As global energy demand continues to grow, the demand for oil and natural gas resources will also continue to increase, which will drive the growth of the fracturing truck market. The domestic oil and gas industry has entered a new stage of development. Oil and gas exploration and development are increasing, and the demand for fracturing trucks and other equipment is also increasing. With the improvement of environmental awareness and the continuous advancement of technology, fracturing trucks will also become more environmentally friendly and efficient. Some new technologies, such as intelligent control and high-pressure injection, are gradually being applied to fracturing vehicles, making their performance even more outstanding.
