The global Acid-free Soldering Flux market size is expected to reach \$ 244.7 million by 2030, rising at a market growth of 5.5% CAGR during the forecast period (2024-2030).

Acid-free soldering flux is an auxiliary material used in the welding process. It does not contain acidic components. Its main functions include removing oxides, improving the wettability of the welding surface, and preventing re-oxidation, thereby making the welded joint stronger and more reliable. Compared with acid-containing flux, acid-free flux is more environmentally friendly, more friendly to welding materials and equipment, and does not produce corrosive substances.

This report studies the global Acid-free Soldering Flux production, demand, key manufacturers, and key regions.
