Abstracts

According to our (Global Info Research) latest study, the global Acidic Degreasing Agent market size was valued at US\$ 4322 million in 2025 and is forecast to a readjusted size of US\$ 6531 million by 2032 with a CAGR of 6.1% during review period.

In 2025, global sales of Acidic Degreasing Agents are estimated at 15 million tons, with an average selling price of approximately US\$280 per ton. As a specialty industrial cleaning chemical that removes grease, scale, and provides mild surface activation, its industrial chain is clear: upstream core raw materials include inorganic acids such as phosphoric acid and sulfuric acid, organic acids such as citric acid, and various surfactants and corrosion inhibitors, with acidic raw materials accounting for as much as 30-40% of the cost. The global industry's total capacity is approximately 20 million tons per year, with downstream consumption highly concentrated. The automotive manufacturing industry is the largest consumer, followed by steel processing and metal electroplating and coating industries, which together constitute the basic market demand. Looking to the future, the core market demands and opportunities lie in: First, green and environmentally friendly transformation. Driven by increasingly stringent regulations (such as restrictions on phosphorus and volatile organic compounds, VOCs), developing phosphorus-free, low-VOC, and biodegradable formulations is a clear trend. Second, functional integration and specialization. High-value-added products that can achieve multiple functions such as degreasing, rust removal, and passivation for cleaning special materials like aluminum alloys and high-strength steel will gain premium pricing power. Third, business model upgrading. Shifting from simply selling chemicals to providing comprehensive 'product + service' solutions, including tank management and wastewater treatment solutions, is the key to building long-term customer loyalty and obtaining higher profits.
