## Abstracts

According to our (Global Info Research) latest study, the global Acilizumab market size was valued at US\$ 350 million in 2025 and is forecast to a readjusted size of US\$ 1055 million by 2032 with a CAGR of 10.9% during review period.

Acilizumab is a monoclonal antibody drug that targets the interleukin-6 (IL-6) pathway. It exerts anti-inflammatory and immunomodulatory effects by binding to the IL-6 receptor and inhibiting inflammatory signal transduction. The drug is widely used in the treatment of autoimmune diseases such as rheumatoid arthritis, and it also has significant clinical value in inflammatory conditions like cytokine release syndrome. As a biologic agent, Acilizumab demonstrates high specificity and efficacy, showing notable benefits in improving patient symptoms and slowing disease progression, and has become an important therapeutic option in the field of IL-6 inhibitors. In 2025, global production of axatilimab reached approximately 15,000 vials.

Acilizumab, as a monoclonal antibody targeting the interleukin-6 (IL-6) pathway, holds an important position in the treatment market for autoimmune and inflammatory diseases. With the continuous increase in the number of patients with chronic conditions such as rheumatoid arthritis, along with the growing demand for precise immunomodulatory therapies, the IL-6 inhibitor market is maintaining steady growth. From a competitive landscape perspective, the field consists of originator drugs and multiple biosimilars, leading to intensifying competition, which in turn improves product accessibility and drives price reductions. On a global scale, Acilizumab has strong penetration in hospital channels and specialty care settings, with particularly significant growth potential in emerging markets. Looking ahead, with further expansion of indications (such as inflammatory syndromes) and broader medical insurance coverage, the market size of Acilizumab is expected to continue growing, maintaining its important

role in the IL-6 targeted therapy landscape.
