The global Acinetobacter Infections Treatment market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Acinetobacter is a group of bacteria commonly found in soil and water. While there are many types or “species” of Acinetobacter and all can cause human disease, Acinetobacter baumannii accounts for about 80% of reported infections.

Outbreaks of Acinetobacter infections typically occur in intensive care units and healthcare settings housing very ill patients. Acinetobacter infections rarely occur outside of healthcare settings.

Acinetobacter is often resistant to many commonly prescribed antibiotics. Decisions on treatment of infections with Acinetobacter should be made on a case-by-case basis by a healthcare provider. Acinetobacter infection typically occurs in ill patients and can either cause or contribute to death in these patients.

In the American market, Major manufacturers include Entasis Therapeutics, Roche, Adenium Biotech, Vaxdyn, Hsiri Therapeutics, Aridis Pharmaceuticals, and Legochem Biosciences, Atterx Biotherapeutics, Achaogen, Peptilogics, Sealife Pharma, Shionogi, Techulon and Tetrphase Pharmaceuticals, among others.
