## Abstracts

Acne is considered to be among the topmost prevalent diseases in the world. The inflammatory acne segment is the largest acne type segment in the global acne treatment market. The average age of onset of acne has reduced from 14-15 years to 11-12 years due to changing demographics and social habits. Moreover, some of the misleading media content continue to encourage the habit of self-medication that often backfires, resulting in further complication.

### SCOPE OF THE REPORT:

This report studies the Acne Treatment market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Acne Treatment market by product type and applications/end industries.

Globally, the demand for minimally invasive cosmetic treatment procedures is increasing significantly. Dermatologists prefer to treat skin diseases through the use of topical applications or less invasive procedures rather than surgical methods. More informed decision making, better patient-physician relationships and well documented procedures are leading to increasing demand for treatments pertaining to face and skin related problems. This has been driving adoption of various less painful aesthetic combination therapy procedures. Further, increasing demand for faster treatments and quicker results are factors expected to drive demand for equipment based procedures such as lasers.

The global Acne Treatment market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Acne Treatment.
