Scope of the Report

This report focuses on the Acrylic Fibers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Many companies have acrylonitrile plants, which would help them to control production costs. The difference price between acrylonitrile and acrylic fibers is an important factor in determining acrylic fibers profit. During past five years, global acrylic fibers price varied greatly. From 2013, global average price increased from 2831 USD/MT to 2903 USD/MT in 2014. Since 2015, price decreased greatly to 2472 USD/MT. The decrease trend continued in 2016. In 2017, acrylic fibers price started increasing.

All manufactures in the world are committed to the improvement of product. As there are two major production process, such as wet spinning and dry spinning. Dry spinning is an advance technology compared with wet spinning process. Currently, manufacturers in China and India are more likely to used wet spinning process except Indian Acrylics and Qilu Petrochemical (a subsidiary of Sinopec in China). Aksa in Turkey also use wet spinning process.

This industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, the
