Acryloyloxy silane is a series of silane coupling agents containing acryloyloxy groups, known for their unique chemical reactivity. These agents can form chemical bonds with inorganic surfaces (such as glass, metal, and ceramics) through the silane group, while the acryloyl group can undergo polymerization with organic materials. This dual reactivity makes acryloyloxy silane highly effective in enhancing adhesion, mechanical properties, and durability of composite materials, commonly used in coatings, adhesives, and sealants.
