## Abstracts

This report studies the ACSR market, Aluminium conductor steel-reinforced cable (ACSR) is a type of high-capacity, high-strength stranded conductor typically used in overhead power lines. It is concentrically stranded conductor with one or more layers of hard drawn 1350-H19 aluminium wire on galvanized steel wire core. The core can be single wire or stranded depending on the size. Steel core wire is available in ACSR, ACSR/TW or ACSR/AW for corrosion protection. Additional corrosion protection is available through the application of grease to the core or infusion of the completed conductor with grease.
