According to our (Global Info Research) latest study, the global Activated Alumina market size was valued at USD 675.5 million in 2023 and is forecast to a readjusted size of USD 843.1 million by 2030 with a CAGR of 3.2% during review period.

Activated alumina is a form of aluminum oxide that is very porous and bonds with certain liquids and gases without its chemical or physical form changing. Due to its high porosity, it has a high ratio of surface area to weight. It is commonly used as a desiccant, for water treatment, and as a catalyst in natural gas and refining operations.

Global activated alumina key players include Honeywell International Inc, Axens, CHALCO, Huber, BASF SE, etc. Global top 5 manufacturers hold a share over 50%.

North America is the largest market, with a share over 40%, followed by Europe and China, both have a share over 40% percent.

In terms of product, sphered form activated alumina is the largest segment, with a share over 90%. And in terms of application, the largest application is desiccant followed by fluoride adsorbent.
