Activated Hydrophobic Silicon Dioxide is a specially treated form of silicon dioxide designed to repel water while maintaining the material's beneficial properties, such as high surface area and absorbency. This is achieved through surface modification, typically with silanes or silicones, making the particles highly hydrophobic. Commonly used in industries like coatings, adhesives, pharmaceuticals, and cosmetics, it helps improve moisture resistance, enhances product flow, and serves as a reinforcing agent. Its unique properties make it ideal for applications where water absorption needs to be minimized, such as in sealants, defoamers, and anti-caking agents.
