According to our (Global Info Research) latest study, the global Activated Zeolite Powder market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Activated Zeolite is a super-fine zeolite powder. Zeolites known as molecular filters have the potential to adsorb heavy metals in wastewater, but zeolites in nature have many impurities, so it was activated to remove impurities and increase the effectiveness of zeolite adsorption. Activated zeolite differs from regular Zeolite Powder in that the water that zeolite naturally contains has been removed by a four-step activation process. This increases the surface area of the zeolite. It also removes any microbes that may be present in the water.
