## Abstracts

According to our (Global Info Research) latest study, the global Active Electrical Cables (AEC) market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

An active electrical cable, also known as an active cable or an active optical cable (AOC), is a type of cable that integrates active components to boost or extend the electrical or optical signals transmitted through the cable. Unlike passive cables, which simply transmit signals without any active processing, active cables incorporate built-in electronics to improve signal quality and enhance performance over longer distances.

Active electrical cables are commonly used in various applications, including data centers, computer networking, audio/video systems, and high-speed interconnects. They are designed to overcome the limitations of traditional copper or fiber-optic cables, such as signal degradation, distance limitations, and susceptibility to electromagnetic interference (EMI) or signal loss.

The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

According to our Communications Research Centre, in 2022, the global communication equipment was valued at US\$ 100 billion. The U.S. and China are powerhouses in the manufacture of communications equipment. According to data from the Ministry of Industry and Information Technology of China, the cumulative revenue of

telecommunications services in 2022 was ?1.58 trillion, an increase of 8% over the previous year. The total amount of telecommunications business calculated at the price of the previous year reached ?1.75 trillion, a year-on-year increase of 21.3%. In the same year, the fixed Internet broadband access business revenue was ?240.2 billion, an increase of 7.1% over the previous year, and its proportion in the telecommunications business revenue decreased from 15.3% in the previous year to 15.2%, driving the telecommunications business revenue to increase by 1.1 percentage points.
