According to our (Global Info Research) latest study, the global Active Infrared Safety Light Curtain Sensor market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The elevator light curtain is a light-type elevator door safety protection device, which is suitable for passenger elevators and freight elevators to protect the safety of passengers. It consists of four parts: an infrared transmitter and receiver installed on both sides of the elevator car door, a power box installed on the top of the car, and a special flexible cable. There are multiple infrared transmitting tubes in the transmitter. Under the control of the MCU, the transmitting and receiving tubes are turned on in sequence, and the car door area is continuously scanned from top to bottom to form a dense infrared protection light curtain. When any beam of light is blocked, the control system immediately outputs a door opening signal, and the car door stops closing and reverses to open. The elevator door can only be closed normally after the passengers or obstacles leave the warning area, thereby achieving the purpose of safety protection, which can avoid the occurrence of elevator pinching accidents.

According to data released by the National Bureau of Statistics, China's elevator production in 2022 was 1.455 million units, which was down 5.8% compared to last year. After years of development, China has become the world's largest elevator producer and consumer. More than 70% of the world's elevator manufacturing business

were in Chinese mainland, and 60%-65% of the world's elevators sold in the Chinese market. According to data from the China Elevator Association, by the end of 2022, the number of elevators registered in operation in China has reached 9.65 million, and more than 15,000 elevators have been installed after acceptance.
