According to our (Global Info Research) latest study, the global Active Protection Network market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The active protection net protects the slope surface, inhibits collapse, weathering, peeling, and sliding, and limits the movement range of local or small rockfalls. It is used when there are small rockfalls or high-quality slopes. It can meet the anti-corrosion life requirements of up to 100 years, but its reinforcement capacity is only about 70%-80%, which is not suitable for large pieces of lone stone with a volume larger than 1m³.
