Abstracts

According to our (Global Info Research) latest study, the global Active RFID Readers market size was valued at USD 1347.9 million in 2023 and is forecast to a readjusted size of USD 2740.9 million by 2030 with a CAGR of 10.7% during review period.

This report focus on Active RFID Readers market. Active RFID readers use battery powered RFID tags that do not require energy from the readers for sending signals. Due to the fact that the active RFID tags have their own source of power and transmitter, it enables the tag to broadcast signals.

Active RFID systems are typically used for large applications, such as railway cars, reusable containers, and other objects that need to be monitored over long distances. In most cases, an active RFID system will operate on the ultra-high frequency (UHF) band, which offers a range of up to 100 meters.

The Global Info Research report includes an overview of the development of the Active RFID Readers industry chain, the market status of Surveillance and Security (Wireless Active RFID Readers, Wired Active RFID Readers), Healthcare Sector (Wireless Active RFID Readers, Wired Active RFID Readers), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Active RFID Readers.

Regionally, the report analyzes the Active RFID Readers markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness.
