## Abstracts

According to our (Global Info Research) latest study, the global Active Security System market size was valued at US\$ 1794 million in 2025 and is forecast to a readjusted size of US\$ 2952 million by 2032 with a CAGR of 8.1% during review period.

In 2024, global Active Security System reached approximately 525,162 units, with an average global market price of around US\$ 3320 per unit. Gross margin is about 35%. The cost is 2158 usd. Production Capacity is about 600,000 units. A Active Security System refers to a proactive security solution that actively detects, responds to, and mitigates threats in real time through sensors, control logic, and automated response mechanisms, rather than relying solely on passive deterrence. Such systems typically include components such as intrusion detection sensors, access-control devices, surveillance and analytics modules, alarm and communication units, and centralized control platforms that can trigger alerts, lockdowns, barriers, or coordinated responses when a threat is identified. Upstream, the supply chain comprises suppliers of electronic components, sensors, cameras, communication modules, control hardware, embedded software, and system-level design and manufacturing services. Downstream, Security Active Systems are deployed by government agencies, critical infrastructure operators, commercial and industrial facilities, transportation hubs, and residential complexes, with system integrators responsible for deployment and customization, maintenance and monitoring service providers ensuring continuous operation, and regulatory or certification bodies overseeing compliance with safety, cybersecurity, and performance standards.
